EDUCATION

BML Munjal University

Bachelor of Technology in Computer Science Engineering

Gurugram, Haryana, India

July 2024 – August 2028

- Current CGPA: 6.8
- Coursework: Data Structures & Algorithms, Probability & Statistics, Web Development

TECHNICAL SKILLS

Languages : JavaScript, Python, C++, SQL

Frontend : React.js, HTML5, CSS3, JavaScript (ES6+)

Backend & Databases : Node.js, Express.js, MongoDB, PostgreSQL, REST APIs, JWT Authentication

Tools & Platforms : Git, GitHub, Vercel, Render

Core Concepts : Data Structures & Algorithms, DBMS, OOPs, Operating Systems

PROJECTS

Servix – SLA-Based Request Management System | *React.js, Node.js, Express.js, MongoDB* | GitHub | Live 2025

- Engineered a 3-tier SLA request platform (user / staff / admin) with role-based auth, serving real-time request tracking across all roles — reduced manual escalation by an estimated 40%.
- Implemented role-based authentication and request assignment workflows based on request priority levels.
- Architected an auto-escalation engine triggered on SLA breach timestamps — eliminated the need for manual supervisor intervention on overdue tickets.
- Built admin controls for request monitoring, reassignment, and workflow management to ensure timely issue resolution.

Deadline Buddy – Task Management Platform | *React.js, Node.js, Express.js, MongoDB* | GitHub | Live 2026

- Shipped a MERN task management platform with subject-level deadline tracking and progress analytics — deployed live with secure JWT auth and responsive React dashboards.
- Engineered server-side deadline reminder triggers with per-subject progress tracking — reducing missed-deadline risk through automated scheduling logic.
- Optimised React state management across subject/task/deadline entities — ensuring consistent UI updates without redundant API calls.
- Designed responsive user dashboards with secure authentication and profile management functionality.

Expense Tracker | *MERN Stack* | GitHub | Live 2025

- Built a MERN expense tracker with secure JWT auth, dynamic income/expense CRUD, and a Chart.js analytics dashboard for real-time spending pattern visualisation.
- Implemented graphical analytics dashboard for visualizing spending patterns and financial summaries.
- Built secure authentication and profile management features for personalized expense tracking.

EXPERIENCE

Glitch 2.0 BML Munjal University
Operations Team Member June 2025 – July 2025

- Assisted in organizing and managing operations for a 24-hour hackathon event with student participants and technical teams.
- Coordinated event logistics, participant support, and workflow management to ensure smooth event execution.
- Collaborated with organizing teams to handle registrations, scheduling, and on-ground technical coordination.

Hacked 4.0 BML Munjal University
Offline Marketing Team Member November 2025 – December 2025

- Contributed to offline promotional campaigns for a 24-hour open-theme hackathon to increase student participation.
- Coordinated outreach activities and engagement initiatives to promote event visibility across campus.
- Assisted in participant onboarding and communication during the event organization process.

ACHIEVEMENTS & LEADERSHIP

- Coordinated operations and event management activities for 24-hour hackathon events with 500+ participants.
- Contributed to offline marketing and participant outreach initiatives for technical events at the university.

OPEN SOURCE

- Maintained organized GitHub repositories for full-stack web development projects with deployment-ready workflows and documentation.
